

PYTHON DEVELOPMENT

Internship Task List · Prepared by InfozaTech

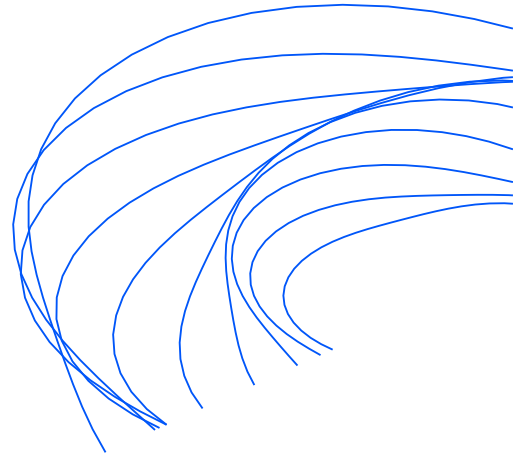

ABOUT INFOZATECH

InfozaTech is a technology-driven internship community built to help students and early-career developers gain real, hands-on project experience. Our focus spans web, mobile, and software development, giving every intern practical skills they can showcase to employers.

We believe internships should teach more than theory. Through structured tasks, self-paced projects, and an active peer community, InfozaTech gives interns a space to build confidence, build a portfolio, and grow into industry-ready developers.

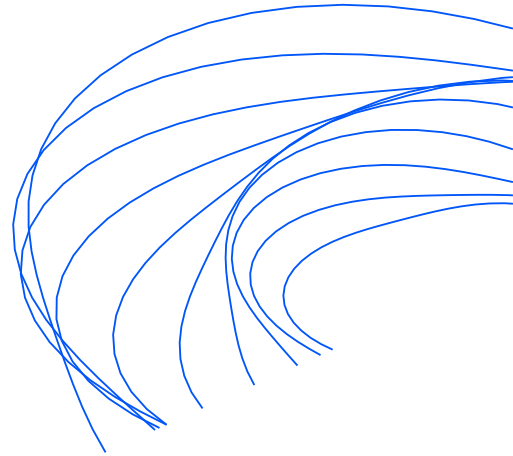

INSTRUCTIONS

- Update your LinkedIn profile so it reflects your current internship and skills.
- For the Python Development internship, complete at least 3 tasks from the task list for successful completion of the internship.
- Maintain a separate GitHub repository named INFOZATECH for all your tasks, and share the repo link in the task submission form (sent to you later by email).
- Feel free to use online resources, tutorials, and videos while working on your tasks.

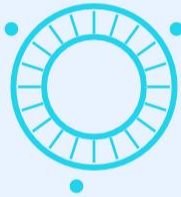

SUBMISSION

- A task submission form will be shared with you later by email — please continue working on your tasks until then.
- Record a short video demo showcasing the task you've completed and the effort behind it.
- Post your demo video on LinkedIn as proof of work — this also helps build credibility with your peers and future employers.
- Tag InfozaTech in your post, and add #infozatech #internship #python for extra reach and visibility.

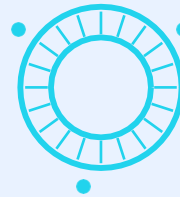

ABOUT THE INTERNSHIP

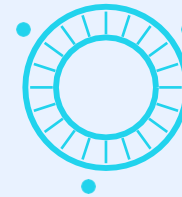

Completion Certificate

Awarded once you submit your tasks successfully.

Placement Support

Guidance and support as you look for full-time roles.

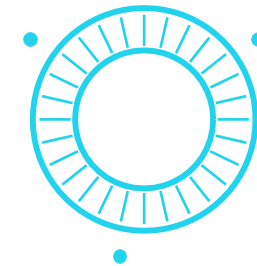

Network Opportunity

Connect with peers and mentors across the community.

PYTHON DEVELOPMENT

For the Python Development internship, complete at least 3 of the 5 tasks below for successful completion of the internship.

TASK 1

TO-DO LIST APPLICATION

1. Let the user add a new task with a short description.
2. Display all pending tasks in a numbered list.
3. Let the user mark a task as complete, or remove it from the list.
4. Persist tasks to a file (e.g. JSON or text) so the list survives between runs.
5. Bonus: add due dates and sort tasks by priority or deadline.

TASK 2

ROCK, PAPER, SCISSORS GAME

1. Let the user choose rock, paper, or scissors.
2. Have the computer randomly pick one of the three options.
3. Compare both choices and decide the winner based on the game's rules.
4. Display the result of each round and keep a running score.
5. Let the user play multiple rounds and show the final score at the end.

TASK 3

BMI CALCULATOR

1. Take the user's height (in cm or m) and weight (in kg) as input.
2. Calculate the Body Mass Index using the standard BMI formula.
3. Classify the result into categories such as underweight, normal, overweight, or obese.
4. Display the calculated BMI along with its category to the user.
5. Bonus: let the user save past readings and see how their BMI changes over time.

TASK 4

PASSWORD GENERATOR

1. Ask the user for the desired password length.
2. Let the user choose which character sets to include — letters, numbers, and symbols.
3. Randomly generate a password that meets the chosen criteria.
4. Display the generated password to the user.
5. Bonus: let the user generate and save multiple passwords in one session.

TASK 5

CONTACT BOOK

1. Let the user add a new contact with a name, phone number, and email.
2. Display all saved contacts in a readable list.
3. Let the user search for a contact by name.
4. Let the user update or delete an existing contact.
5. Persist contacts to a file or a lightweight database (e.g. SQLite) so data isn't lost.

ASK US FOR HELP!

- The purpose of this internship is to learn and grow.
- We have no desire to dictate to you — it's entirely up to you whether you seek guidance or not.
- The tasks may feel easy or difficult depending on your experience. We simply expect you to approach them with professional diligence and give them the attention they deserve.
